welcoming

DR. JEY KOEHLER

as the new

PRESIDENT

of the Davis Thompson
Foundation

DR. JEY KOEHLER

Jey is currently on sabbatical leave and has agreed to take over as President starting on March 1st, 2021. Until then, Dr. Francisco Uzal will continue to carry on the activities of CEO and President.

We are thrilled with Jey's new appointment!

She is a world-renowned pathologist, who has been a member of the faculty of discussants of the Foundation for many years and, most importantly, Jey is and has been for several years, the director of one of the Foundation's most prestigious courses: the Descriptive Veterinary Pathology course. Under Jey's leadership, the DVP course reached the outstanding standard it enjoys today. This year, because of COVID, Jey and her team transformed, in record time, the whole DVP course into a fully digital version, which was offered to trainees all over the world. Jey has the knowledge, enthusiasm and commitment, to take the Foundation to the next level.

Welcome Jey!

Passionate Voices Drive Change in Veterinary Profession

Participants Review of Black Voices in Pathology II

By

Laura Setyo BVSc (Hons), MRCVS, MANZCVS (Veterinary Pathology), Diplomate ACVP

Black Voices in Pathology II was an inspiring event that highlighted some of the prominent black veterinary pathologists in our field and allowed them to share their stories with us. This invaluable event doubtless resonated with many people, particularly those from ethnic minorities and diverse backgrounds. The talk started with a personal introduction to each panellist and it was truly heart-warming to encounter these incredibly relatable, down-to earth and articulate personas and role models. With their varied experiences, hearing them discuss how much, or how little, had changed over the years was eye-opening and thought-provoking. There were tales of feeling different, of looking for a place to belong, of forever feeling like "the only" one. But amidst the tales of hardship there was also a sense of profound togetherness, with panellist, presenters and audience members rallying behind the overarching message: We need to stick together! We need to do something about racial injustice! From open forums that foster inclusivity, to book recommendations for further education, and spearheading a white paper on diversity, equity and inclusion, many actions were discussed. It is clear without strong advocacy, by all members of our profession including white allies, we will go nowhere fast. Now, more than ever, we need to band together to effect real change. That the Davis Thompson Foundation is providing a platform for these discussions demonstrates their commitment to diversity and inclusivity, and for that we are excited for what is to come.

2021 Northeastern Veterinary Pathology Conference

5-6 February

VIRTUAL SEMINAR

Guest speaker

Dr. Bryan Murphy

University of California - Davis

Diagnostic Exercise From The Davis-Thompson Foundation

Case #157 Month: **January** Year: **2021**

Contributor: Eryca Ceolin Lamego*, DVM, MS candidate (erycalamego@gmail.com), Alex dos Santos*, DVM, MS, PhD candidate, Glaucia D. Kommers*, DVM, MS, Doctor in Veterinary Pathology, Mariana Martins Flores*, DVM, MS, Doctor in Veterinary Pathology. *Laboratory of Veterinary Pathology, Universidade Federal de Santa Maria (UFSM), Santa Maria, Rio Grande do Sul, Brazil

Clinical History: A 3-year-old Angus bull had a six-day history of weakness, absent ruminal motility, hind limb paralysis, paddling movements and opisthotonos, progressing to spontaneous death. Other animals from nearby farms had died with similar clinical signs in the last months.

Necropsy Findings: The practicing veterinarian performed the necropsy in the field and sent the whole brain fixed in 10% formalin for examination at our lab. There were no gross changes in the brain. Representative histological findings are in Figures 1 and 2.

Microscopic images:

Follow-up Questions:

1. What is/are your morphological diagnosis(es)?
2. What is your etiologic diagnosis?
3. Describe the most probable mechanism of infection.
4. What other neurologic diseases should be considered as differential diagnoses?

Answers and more info [here!](#)

*The Diagnostic Exercises are an initiative of the **Latin Comparative Pathology Group (LCPG)**, the Latin American subdivision of The Davis-Thompson Foundation. These exercises are contributed by members and non-members from any country of residence. Consider submitting an exercise!

Become a member of the Latin Comparative Pathology Group

LCPG:

- Provides Diagnostic Exercises
- Offers travel awards

Retiring?

Have slides left over from your recent slide seminar? Just looking to free up some storage space? The Foundation is looking for additional glass slides, kodachromes and other similar materials for its Correspondence Division and Study Centers. All materials should be well identified with as much accompany history and discussion as possible, as these materials are expressly used for teaching. Moreover, as the Foundation is a publicly donative charity, all donated materials are tax-deductible. For more information, please contact Dr. Bruce Williams at bruce.h.williams.dvm@gmail.com.

Davis-Thompson Foundation Pathology Externship

Since 1980, the Davis-Thompson Foundation lab sites have hosted more than 125 veterinary students at 8 participating diagnostic laboratories. These students usually have a strong interest in pathology itself or zoo or poultry medicine that require a strong pathology background. The Foundation is always interested in having veterinary students apply for an externship and we would like to add more externship sites that do not usually have veterinary students, to help increase their interest and knowledge of pathology with some off-campus experience. For more information, contact Dr. Jim Britt, jobritt@sbcglobal.net; 501-912-1449.

Great for resident training!

AAVLD Histopathology Slide Sets available!

Slide sets of cases presented at the 63rd Annual AAVLD Meeting 2020 diagnostic histopathology seminar are now available for purchase for \$60 per box, includes shipping to North America.

*Contact Asli Mete (amete@ucdavis.edu) for questions or purchase.

>>> BUY TICKETS <<<
**THE WCVD9
 DERMATOPATHOLOGY
 PROGRAM**
 ACCESS THE FULL DERMATOPATHOLOGY PROGRAM FOR £100+VAT

Hear from expert speakers about everything you need to know about dermatopathology, including diagnosis of alopecic disorders, three excellent clinicopathologic correlation sessions and two four hour wetlab sessions.

What will you get with your ticket?

- The most cost-effective dermatopathology education: for experienced dermatopathologists, pathologists and dermatologists
- **Comprehensive and Advanced Dermatopathology wetlabs:** features comprehensive overview and advanced interpretation of histopathology of various skin diseases of different species delivered by global experts. Slides presented during the wetlabs can be previewed online.
- **A case-based approach to skin diseases:** advantages, pitfalls and factors that impact histopathologic interpretation
- **Affordable and convenient continuing education:** from the comfort of your office to suit your schedule, on demand until April 2021

"Participants are just blown away by the virtual format, content/presentations and quality of cases from both Microscope Wetlabs. They feel like they are able to take more from this experience because they can go at their own pace."

Dr Barbara McMahon

SOCIETY OF
TOXICOLOGIC PATHOLOGY

NEWS FROM THE STP

Calling all students and residents curious about toxicologic pathology!

The Student/Resident Corner (SRC) is a new addition to the Society of Toxicologic Pathology's website that aims to provide community and resources to help you learn more about this career path and connect with others interested in the field. It includes a calendar of upcoming events, information on previous speakers/training institution program (STIP) visits, externships, scholarships/awards, and profiles of our student liaisons and current pathologists working in the field. It is free, available to all students and can be accessed under the student tab on the STP website homepage.

[CLICK HERE](#) to go directly to the SRC homepage.

Virtual Continuing Education Symposium 3: Carcinogenesis

2nd – 11th March 2021

Tuesday, Wednesday, and Thursday

13.00 – 16.30 (GMT+0/UCT+0)

Approved by the Royal Society of Biology for the purposes of CPD, this event may be counted as approximately 54 credits. Approximately 17.5 hours of educational activity will be recorded on Attendance Certificates.

Registration for this symposium is still open - nearly 50% of the places have been taken, with numbers limited to a maximum of 50 delegates!

<< Due to the reduced logistical requirements for this virtual symposium, the BSTP have been able to extend the early registration fee to 5th February 2021 and the closing date for registration to Friday 19th February 2021 >>

Continuing Education Symposium 3 will be held over two weeks - on the afternoons of Tuesday 2nd, Wednesday 3rd, Thursday 4th, Tuesday 9th, Wednesday 10th and Thursday 11th March 2021, from 13.00 – 16.30 (GMT+0/UCT+0) each day.

Access to the downloadable course materials and Zoom login information will be provided up to one week in advance of the symposium to all those who have registered and paid.

This virtual CES will provide an overview on carcinogenesis and the challenges with current research models. Topics to be covered include (but are not limited to): cancer in man and the history of carcinogenesis; investigation of the pathogenic mechanisms involved in carcinogenesis; significance and interpretation of neoplasia in laboratory rodents; use of immunohistochemistry for tumour identification; an overview of animal models of cancer; Inhalation toxicity and carcinogenesis; the regulatory view of carcinogenicity testing; and will include lectures, presentations, and case histories.

To reserve a place or if you would like further information about this symposium, please contact the BSTP Secretariat – bstpoffice@aol.com

[CLICK HERE](#) for more information.

Virtual Continuing Education Symposium 4: Respiratory System
6th – 15th July 2021
Tuesday, Wednesday, and Thursday
13.00 – 16.30 (GMT+1/UCT+1)

Approved by the Royal Society of Biology for the purposes of CPD, this event may be counted as approximately 54 credits. Approximately 17.5 hours of educational activity will be recorded on Attendance Certificates.

Registration for this symposium will open in December 2020/January 2021 with numbers limited to a maximum of 50 delegates – registration will close at midnight on 18th June 2021!

Continuing Education Symposium 4 will be held on the afternoons of Tuesday 6th, Wednesday 7th, Thursday 8th, Tuesday 13th, Wednesday 14th and Thursday 15th July 2021, from 13.00 – 16.30 (GMT+1/UCT+1) each day.

Access to the downloadable course materials and Zoom login information will be provided up to one week in advance of the symposium to all those who have registered and paid.

This virtual Continuing Education Symposium will provide an overview of the respiratory system including INHAND, rodent and non-rodent respiratory pathology, toxicology and risk assessment as well as reviewing challenges in agrochemical safety assessment. The format will include lectures, presentations, and case histories.

To reserve a place or if you would like further information about this symposium, please contact the BSTP Secretariat – bstpoffice@aol.com

[CLICK HERE](#) for more information.

**The 36th Annual Scientific Meeting of the BSTP and AGM Pathology of
Humanised Mouse Models
Thursday 11th and Friday 12th
November 2021
Date and venue to be confirmed**

Immunodeficient mice reconstituted with a human immune system are increasingly used for modelling the human immune compartment in numerous preclinical applications, such as adoptive cell therapy and immuno-oncology studies. With the advent of new Advanced Therapy Medicinal Products, humanised mice are a key component of efficacy and safety assessment in preclinical programmes, including GLP studies. However, limited information is available concerning the morphological aspects of human cell engraftment and the spectrum of spontaneous and experimentally induced histopathological lesions occurring in these mice.

Working with the Pathological Society of Great Britain and Ireland the meeting will cover the main features of the different humanised mouse platforms; their experimental applications in drug development, oncology and gene and cell therapies; specific safety and regulatory considerations; and future promise and remaining challenges. A short session will be also devoted to chimeric mice with humanised livers, as tools for the study of human drug metabolism and toxicity. The aim is also to have parallel sessions covering 'mouse pathology' and 'humanised mice in preclinical studies: context and regulatory aspects'.

The first day of the meeting will include the Annual General Meeting of the BSTP.

Keep checking the website for details of bursaries and the submission of abstracts for case presentations.

Sponsorship and Promotional Opportunities

We feel that by participating in this conference it would allow your company to showcase a range of products to a diverse group of scientists. Please contact the BSTP at bstpoffice@aol.com more information.

Registration will open in March/April 2020, to reserve a place or if you would like further information about this meeting please contact the BSTP Secretariat – bstpoffice@aol.com

[CLICK HERE](#) for more information.

If you are interested in attending any events organised by the BSTP, please visit the BSTP website -

<http://www.bstp.org.uk/bstp-events/>

or for details of events organised by other organisations - <http://www.bstp.org.uk/non-bstp-events/>

or contact the BSTP Secretariat: bstpoffice@aol.com
