

Research Animal Resources and Compliance

Veterinary Pathologist I
Business Title: Comparative Pathologist

Are you a veterinary pathologist looking to solve interesting problems in research animals? Do you have an interest in the comparative pathology of a wide variety of different species? The Comparative Pathology Laboratory in the Research Animal Resources and Compliance (RARC) is looking for a Veterinary Pathologist I to help support the research animal program at UW-Madison. Come join our team!

Job Summary:

The Veterinary Pathologist works with the RARC veterinary team to provide diagnostic services for the research animal population on campus. This position will also provide research pathology services to investigators on a fee-for-service basis. The Veterinary Pathologist works with a small team of professionals within RARC and reports to the Manager of Comparative Pathology.

Qualifications:

DVM/VMD degree required. Three plus years in veterinary pathology work with a significant comparative and/or laboratory animal component (Residency work accepted). Board certification with the ACVP preferred, but not required. Experience with biomedical swine and rodents preferred.
