**It gives me great pleasure to present to our readers the comments that the members of the Davis/Thompson Foundation Board of Directors provided in honor of Dr. Bruce Williams. Bruce recently stepped down as CEO of the Foundation after many years being the driving force behind the enormous success that the Foundation has achieved as the greatest organization promoting the teaching of veterinary pathology in the world. Thank you to Stephanie Shrader and Javier Asin for compiling these comments, and thank you to the members of our Board for providing these heartwarming thoughts.**

**Francisco (Paco) Uzal**

**I have been knowing Dr. Bruce Williams from 1993 when we both participated to one of the Cornell Olafson Courses organized by Professor John King and supported by Samuel W. Thompson . Bruce enthusiasm for Pathology was always contagious and His contribution to the continuing education in our field has been invaluable. American Trainees and Faculty definitely benefitted from his intense activities, but Bruce was able to bring the Foundation extremely useful and practical information especially to international students and pathologists, in particular during period of times where it was not easily available.**

**Fabio Del Piero, US**

**I cannot think of anybody who is more committed to teaching and advancement of veterinary pathology. One curious fact, once you meet him, he will never forget your face or name! Infinite thanks Bruce for everything you did and will continue doing for the foundation.**

**Francisco Carvalho, US**

**The highest compliment I can make to describe Bruce's role and impact on the Foundation, is that he has not only stayed true to the example set by Sam, but has been able to move Sam's vision and success to the next level and to adapt to the changes of the environment and the profession. Without Bruce, the Foundation would not be what it is today and his impact on education in veterinary pathology and medicine has been and continues to be truly global.**

**Matti Kiupel, US**

**Bruce you have touched the lives and careers of so many people in the veterinary community. We cannot thank you enough for all that you have done to support people in every stage of their career across the globe. We are all filled with gratitude for your service.**

**L. Tiffany Lyle, US**

**What an honor. Bruce's contributions to Veterinary Pathology through the Foundation are legendary. He has touched and influenced the careers of multiple generations of pathologists across the globe. The deliverables from his efforts reached far, even remote schools in developing nations, and inspired trainees to strive to advance the field. I speak as one of them! Thanks for working on this surprise.**

**Vini Carreira, US**

**I have known Bruce Williams since the 1990s, when he came to Australia and we talked about, then later established the Australian Division of the CL Davis Foundation. He travels well, works hard and plays hard (or used to!). His devotion to the Foundation is 11 out of 10. Congratulations Bruce, you are not done yet, and you already have achieved wonderful things. Congratulations too for being so caring to Sam and Vladi. It did not go un-noticed.**

**Tony Ross, Australia**

**I have known Bruce since 1998-2000 during my residency at the Armed Forces Institute of Pathology (AFIP). After those year, he contributed and launched a lot of diagnostic Veterinary Pathology educational resources and C.L. Davis International training programs into our Korean College of Veterinary Pathologists (KCVF). Due to his great contribution, our society had better chance to have close relationships with other international societies members. I am sending our great appreciations to Dr. Bruce Williams.**

**Kyu-Shik Jeong, Korea**

**First met Bruce as a shave tail captain at AFIP with John King who held him in such high regard. I have been amazed by his ability to contribute so much time to CLD and CLD/SWT and hold another job. He took CLD (and AFIP/JPC) into the 21st century with his computer and media expertise. Really incredible, great job.**

**John Edwards, US**

**Bruce led the Veterinary Department of the former Armed Forces Institute of Pathology into the computer age and has been a role model to get others involved in assisting the digital age of the Davis-Thompson Foundation as President and CEO.**

**Jim Britt, US**

**Bruce has always had a great “can do” attitude and the speed at which he set up the zoom webinars is a great credit to him!**

**Liz McInnes, UK**

**BRUCE: a soldier, veterinarian, pathologist, teacher, international leader, exceptional organizer, a pleasure to work with, fun to be with, a friend.**

**Zadok Ruben, Israel**

**I’ve had the pleasure of learning from Bruce (as a resident) and now for years working with Bruce (Gen path and descriptive courses and the JPC). Bruce has always been inclusive and generous...able to work with all who are devoted to veterinary pathology...always keeping the big picture in mind. He has single-handedly changed the global face, and availability, of pathology training. Perhaps his worst vice is that he is ridiculously responsive to all inquiries and problems, I would guess that the slowest I’ve seen him respond to my questions is, say, 10 picoseconds? That just can’t be good, and also makes us all very dependent on him. I’ve watched him encourage and support people who can help align with the Davis-Thompson mission, but it will be a cold glass of bourbon in Hell before any or many people could replace Bruce. But for the record- if anyone manages to get an iced bourbon into Hell, it will be Bruce.**

**Patricia Pesavento, US**

**Bruce is one of the most dedicated, generous, brilliant, and talented people I know, and his passion for veterinary pathology education is unmatched. He is the heart and soul of the Foundation, and witnessing all his hard work and devotion to the cause makes us all want to put in that little extra!**

**Jey Koehler, US**

**With a calm and approachable demeanor, Bruce has recruited an immense number of members/supporters, implemented innovations bravely, captivated our audiences and led the Foundation by empowering through delegation.**

**Rafaela DeNegri, US**

**I have been a member of the Foundation and have served in various positions since 1978. I have seen the changes brought about by Dr. Williams that have kept the Foundation relevant to the field in this digital age. During Dr. Bruce Williams' role as President and CEO, he successfully built upon the many decades of Dr. Samuel Thompson's leadership and has expanded the Foundation's remit to continuing education in veterinary and comparative pathology into the present. I'm excited by the opportunities he's created that will keep the Foundation moving forward under new leadership. Kudos to Bruce and the continuing legacy he has developed for the Foundation. Thank you, Bruce, for your years of selfless dedication and commitment to the field and the Foundation's future.**

**Steve Dempsey, US**

**My earliest encounter with Dr Williams (Bruce) was during a Gen Path 'Beach Party' in St Pete Beach, FL. I remember to this day how Bruce's boundless knowledge, enthusiasm, wit and, above all, his ability to put nervous pathology trainees at ease captured the essence of the CL Davis Foundation (as it was then). As a Brit, I am, to this day, somewhat bemused at holding a Gen Path course in the basement (no windows!) of a swanky hotel in July in Florida with so much vacation fun, sun tans and margaritas in the air....yet trainees were learning Gen Path (yes, Gen Path) for most of the daylight hours....It is testament to Bruce's skills as a teacher that I came back 'across the pond' for more courses in the following years.). It is no overestimate to say that Bruce's teaching, mock exams, YouTube videos etc contributed not only to my ACVP examination success, but more importantly to the enthusiasm I now have for my own trainees. I cannot think of anyone who has done more for veterinary pathology education globally (save perhaps for Davis and Thompson themselves) than Dr Williams. In recent years I have worked closely with Bruce to organise courses in Europe and he has always been there to offer advice, support and guidance when asked. Bruce - you have true legend status amongst successive trainees and pathologists and your contributions to all that is veterinary pathology are nothing short of monumental!**

**Simon L Priestnall, UK**

**Dr. Bruce Williams is a prince among men. He is unfailingly visionary, inclusive, and supportive. His leadership of the Davis-Thompson Foundation has resulted in the organization becoming the foremost training provider in all of veterinary pathology. We are all honored to have him in our midst and look forward to his continuing and substantive contributions to improving animal health through pathology! He is, quite simply, THE BEST."**

**Corrie Brown, US**

# Diagnostic Exercise From The Davis-Thompson Foundation

Case #115 Month: February Year: 2019

**Contributors:** Renata Dalcol Mazaro\*, DVM, MS, Doctoral candidate; Flávia Serena da Luz\*, DMV, MS, Doctoral candidate; Douglas Miotto Lorensetti\*, veterinary student; Alana Herbichi\*, veterinary student; João Paulo Freitas\*, DVM, MS candidate; Rafael Figuera\*, DMV, MS, Doctor in Veterinary Pathology. \*Laboratory of Veterinary Pathology, Universidade Federal de Santa Maria (UFSM), Santa Maria, Rio Grande do Sul, Brazil.

**Clinical History:** An adult, intact male, mixed breed dog was submitted for necropsy. The dog showed neurological signs including lethargy, head tilt, tetraparesis, and falling. These clinical signs occurred 12 hours following intramuscular administration of an antiparasitic and persisted until spontaneous death. Other two dogs from the same owner had presented similar clinical disease. All three dogs died between 12 and 24 hours after the onset of clinical signs.

**Necropsy Findings:** The caudal cerebellar vermis and medulla oblongata were displaced caudally through the foramen magnum (Figure 1). The brain was moderately hyperemic (Figure 2). Prominent focal hemorrhage and malacia of the cerebellar medulla, thalamus and basal nuclei were present (Figure 3). The lungs failed to collapse (pulmonary edema) and the thymus and kidneys were diffusely dark red (congestion).

**Gross images:**

Figure 1 (Caudal View)

## Diagnostic Exercise From The Davis-Thompson Foundation

Figure 2

Figure 3 (tissue fixed in 10% formalin solution)

**Follow-up Questions:** 1) Morphologic diagnosis, and 2) Differential diagnosis(es).

Answers and more info [here!](#)

\*The Diagnostic Exercises are an initiative of the **Latin Comparative Pathology Group (LCPG)**, the Latin American subdivision of The Davis-Thompson Foundation. These exercises are contributed by members and non-members from any country of residence. Consider submitting an exercise!

## Surgical Pathology of Tumors of Domestic Animals

Edited by M. Kiupel

### Volume 3: Tumors of Soft Tissue

P. Roccabianca, F. Y. Schulman,  
G. Avallone, R. A. Foster, J. L. Scruggs,  
K. Dittmer, M. Kiupel

**AVAILABLE NOW!!!!!!**

**[CLICK HERE](#) to place your order!**

### Retiring?

Have slides left over from your recent slide seminar? Just looking to free up some storage space? The Foundation is looking for additional glass slides, kodachromes and other similar materials for its Correspondence Division and Study Centers. All materials should be well identified with as much accompany history and discussion as possible, as these materials are expressly used for teaching. Moreover, as the Foundation is a publicly donative charity, all donated materials are tax-deductible. For more information, please contact Dr. Bruce Williams at [bruce.h.williams.dvm@gmail.com](mailto:bruce.h.williams.dvm@gmail.com).

### Davis-Thompson Foundation Pathology Externship

Since 1980, the Davis-Thompson Foundation lab sites have hosted more than 125 veterinary students at 8 participating diagnostic laboratories. These students usually have a strong interest in pathology itself or zoo or poultry medicine that require a strong pathology background. The Foundation is always interested in having veterinary students apply for an externship and we would like to add more externship sites that do not usually have veterinary students, to help increase their interest and knowledge of pathology with some off-campus experience. For more information, contact Dr. Jim Britt, [jobritt@sbcglobal.net](mailto:jobritt@sbcglobal.net); 501-912-1449.

SOCIETY OF  
TOXICOLOGIC PATHOLOGY

## NEWS FROM THE STP

**Calling all students and residents curious about toxicologic pathology!**

The Student/Resident Corner (SRC) is a new addition to the Society of Toxicologic Pathology's website that aims to provide community and resources to help you learn more about this career path and connect with others interested in the field. It includes a calendar of upcoming events, information on previous speakers/training institution program (STIP) visits, externships, scholarships/awards, and profiles of our student liaisons and current pathologists working in the field. It is free, available to all students, and can be accessed under the student tab on the STP website homepage.

**[CLICK HERE](#) to go directly to the SRC homepage.**

# HAPPY HISTOLLOWEEN !

**We had a Histolloween contest on Instagram where pathologists submitted histo pictures resembling Halloween related images. We had 7 entries and followers voted for the preferred one. This was the winning picture submitted by Dr. Erin Edwards.**

Dr. Erin Edwards, sometimes known as "Dredwards," is a diagnostic pathologist at the Texas A&M Veterinary Medical Diagnostic Lab (TVMDL) and is also an Adjunct Assistant Professor at the TAMU College of Veterinary Medicine and Biomedical Sciences. She collects pictures of fun shapes and shapes that she encounters while looking at slides, and even turns them into gifts and artwork. The contest entry image is a cross section of a chicken leg that wonderfully resembles a skull. She found it quite humerus
