

Clinical Assistant or Associate Professor of Veterinary Clinical Pathology

The Department of Comparative, Diagnostic, and Population Medicine at the University of Florida College of Veterinary Medicine invites applications for a full-time, non-tenure accruing faculty position in Veterinary Clinical Pathology at the Clinical Assistant/Associate level. The major efforts of the position are clinical service and instruction, which include diagnostic activities in the Clinical Pathology section of the Veterinary Diagnostic Laboratories. The faculty hire will also be expected to be involved in scholarly activity; opportunities exist to explore or develop self-directed special interests in pathology and/or participate in collaborations with other faculty at the CVM and/or Health Science Center. Service to the college is also expected, and can be met by professional, departmental and university appointments.

The faculty hire must have experience in diagnostic cytopathology, hematology, clinical chemistry, and urinalysis, and have the ability to independently sign out cases, in support of the clinical pathology service. The selected applicant will provide service support for on-campus clinical programs at the veterinary teaching hospital, private practitioners, and research customers. The successful candidate will play a pivotal role in training and mentoring three clinical pathology residents, supporting didactic clinical instruction, and advising veterinary students and house officers. Prior instructional experience is desirable, though not required.

The UF clinical pathology service is supported by a high quality, high volume, and diverse caseload with submissions from within the teaching hospital and outside practices, in particular very busy oncology and zoological/wildlife medicine services. The clinical pathology laboratory is well-equipped and includes dedicated sections for cytopathology (MilliporeSigma™ MIDAS™ III Automated Slide Stainer with methanolic Wright-Giemsa), hematology (Siemens ADVIA® 2120i System and IDEXX ProCyte Dx®), clinical chemistry (Beckman Coulter AU480), coagulation (STAGO STA Compact Max®), endocrinology (Siemens Immulite® 1000), urinalysis, and other specialty analyses. The Clinical Pathology Section maintains strong and active interactions with the other hospital services. The university is located in Gainesville, a north-central Florida city with a climate that permits year-round outdoor activities in addition to numerous cultural, shopping, and culinary opportunities and sporting events. The Gulf of Mexico and Atlantic Ocean beaches, as well as the cities of Tampa, Orlando, and Jacksonville, are all within 90 minutes' drive.

The University of Florida Veterinary Diagnostic Laboratories are comprised of dedicated individuals who strive for excellence in diagnostics to improve animal and human health. The current UFVDL pathology team includes 10 anatomic and 2 clinical pathologists and is pursuing American Association of Veterinary Laboratory Diagnosticians (AAVLD) accreditation.

The successful candidate should be able to work with students, faculty, and staff from a wide range of social and cultural backgrounds. We are especially interested in candidates who can contribute to the diversity and excellence of the academic community. The University of Florida student body encompasses nearly 58,000 undergraduate, graduate and professional students, including over 19,000 minority and 5,000 international students. The university is ranked 5th among public universities and the College of Veterinary Medicine 9th among 32 U.S. colleges or schools of veterinary medicine by U.S. News & World Report.

A competitive salary and benefits package are available. Rank and salary will be commensurate with the successful candidate's professional qualifications and experience.

Requirements include a Doctor of Veterinary Medicine (DVM) or equivalent degree and satisfactory completion of a veterinary clinical pathology training program, supervised by ACVP-certified clinical pathologists, at an AVMA-accredited institution.

For full consideration, all applicants must apply online through Careers at UF <https://explore.jobs.ufl.edu/cw/en-us/job/520256/clinical-assistantassociate-professor-of-veterinary-clinical-pathology>. Applicants must submit the following items as a PDF file for full consideration: (1) a letter outlining clinical/diagnostic service, teaching and research experiences as well as professional goals, (2) a current curriculum vitae (CV), and (3) names and contact information for three professional references able to speak to all aspects of the candidate's professional and personal abilities as they relate to this position's responsibilities, and (4) a statement regarding how you would contribute to diversity, equity and inclusion efforts at the University of Florida College of Veterinary Medicine. E-mail inquiries to Dr. Chris Lanier (cjlanier88@ufl.edu), Search Committee Chair, are welcome. Review of applications for job number 520256 will begin immediately and will continue until a candidate is recommended for appointment. Candidates may be invited to interview prior to the application review date, though a hiring decision will not be made until after that date. A start date in early 2022 is preferred, if at all possible.

Final candidate will be required to provide official transcript to the hiring department upon hire. A transcript will not be considered "official" if a designation of "Issued to Student" is visible. Degrees earned from an education institution outside of the United States are required to be evaluated by a professional credentialing service provider approved by National Association of Credential Evaluation Services (NACES), which can be found at <http://www.naces.org/>.

The University of Florida is an equal opportunity institution dedicated to building a broadly diverse and inclusive faculty and staff.
