

Veterinary Clinical Pathologist
Prairie Diagnostic Services Inc. (PDS)
Saskatoon, Saskatchewan

(Review of applications will begin immediately and continue until position is filled)

Prairie Diagnostic Services Inc. is a not-for-profit corporation created as a partnership between the University of Saskatchewan and the Province of Saskatchewan. PDS provides preeminent veterinary diagnostic services and expertise in support of disease surveillance, animal health, public health and environmental health. The laboratory is located in the Western College of Veterinary Medicine (WCVN) on the beautiful University of Saskatchewan Campus in Saskatoon and provides a full range of services to clients including necropsy, surgical pathology, dermatohistopathology, clinical pathology, histology, bacteriology, immunology, molecular diagnostics, virology, endocrinology and toxicology. The laboratory is ISO/IEC 17025 accredited by the Standards Council of Canada and accredited by the American Association of Veterinary Laboratory Diagnosticians.

PDS is currently seeking a skilled, client-focused Clinical Pathologist to provide veterinary diagnostic services to a diverse client group from across Western Canada. The position is permanent full-time.

Your responsibilities will include:

- Provision of diagnostic service in clinical pathology, including, but not limited to hematology, chemistry, urinalysis, endocrinology and cytology;
- Provision of consultation to submitting veterinarians regarding diagnostic findings in a client-focused manner;
- Opportunity to be cross trained to perform surgical pathology exists;
- Teaching duties for undergraduate veterinary students and graduate students may be assigned as a partnership with the Department of Veterinary Pathology, Western College of Veterinary Medicine (WCVN).

Qualifications include a DVM and postgraduate training in veterinary clinical pathology. ACVP certification in clinical pathology is an asset. Eligibility for membership in the Canadian and Saskatchewan Veterinary Medical Associations is also required.

The successful candidate will:

- Have the ability to analyze, interpret and communicate various diagnostic test results in clinical pathology including the areas of hematology, clinical biochemistry, endocrinology, urinalysis and cytology
- Be familiar with modern data processing and communication methods used to report the interpretations of diagnostic tests in a timely fashion
- Demonstrate leadership and the ability to prioritize and meet the divergent needs of stakeholders, including clients, staff and the organization

- Work cooperatively with others in a team-based organizational setting
- Work to provide the best outcome for clients through effective communication, innovative thinking and networking
- Demonstrate a desire to identify and serve client needs and be fully available for consultation within reason
- Identify problems and take initiative to help find appropriate solutions

PDS offers a competitive salary and benefits package.

Electronic resume, letter of application and list of three references should be sent to:
