Q5

What is your overall evaluation of the Seminar?

I'm so glad you held this webinar, dermatopathology is always of great interest. Some of the presenters I've seen live and it's a pleasure to see them again with new information. And with a good internet connection it is a lot more comfortable to view it from home, even if it's late past midnight here where I am. I hope you will keep this format of web meetings in the future, in many aspects it is a lot more convenient. Greetings from Romania and thank you for the work you do!

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

I thought this was a very well organized and presented overview of veterinary dermatopathology. It was a nice blend of basic information, newly emerging information, and molecular pathobiology. I am the most interested in newly emerging entities/information, so Elizabeth's portion was of the most benefit to me. However, I watched all 8 hours with great interest and enjoyment.

Dr. Affolter – Interface dermatitis alopecia	Excellent	Excellent	Excellent	Excellent

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

The seminar was very good but the audio did not sync with the slides (was off by several minutes at times) for Drs. Bradley and Mauldin. This was extremely distracting, especially for Dr. Mauldin as she referred to her slides often and showed lots of pictures. I do not know if I was the only participant experiencing this issue. I wonder if this was secondary to Dr. Mauldin and Bradley presenting from home where Wifi speeds are often slower. Dr. Linder, who presented from a university, did not have any issues with this and the audio and visuals matched. I am well aware that these types of digital presentation platforms are newer to us/me so technical difficulties are not unexpected. Thank you for putting this all on..it was great!!

Q6

Do you have a suggestion for future topics?

I would be happy to tune into anything related to the skin! Something in exotics would be amazing.

Dr. Affolter – Interface dermatitis alopecia	Excellent	Excellent	Excellent	Excellent

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

I feel this seminar was a great overview and refresher of common changes and conditions one sees when evaluating skin biopsies.

Q6

Do you have a suggestion for future topics?

I would keep the topics of this seminar the same. However, it would be great if there was a way to add a brief overview of common skin neoplasms.

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

Great!! Some things felt rushed and there was some overlap between the last presenter and the earlier presenters (but there is overlap between the entities and the way they are categorized so that's not unexpected). There was a bit of redundancy, but it was a nice review for me so I didn't mind.

Q6

Do you have a suggestion for future topics?

Dermatopathology in a Tox path / lab animal path context.

Dr. Linder – Skin pigmentation and comparative pathology	Excellent	Excellent	Excellent	Excellent
Dr. Mauldin – Expanding differential diagnoses for dermatopathologic lesions	Excellent	Excellent	Excellent	Excellent
Dr. Affolter – Interface dermatitis alopecia	Excellent	Excellent	Excellent	Excellent

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

I thought this was great. A great mix of presenters and perspectives; I learned something in every session, and will never look at animal color markings in the same way (and I also know why those hairs turn grey). I actually prefer this zoom format to a large in-person meeting - more comfortable, easier to see and hear, and audience much more likely to ask questions. Also really liked being able to see the questions that were asked.

Q6

Do you have a suggestion for future topics?

Specialty system pathology- renal, ophthalmic, repro.
Species specific pathology - marine mammals, wildlife, zoo
Mix of practical and disease mechanisms is great.

Dr. Affolter – Interface dermatitis alopecia	Excellent	Average	Average	Excellent

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

It was very good. Tons of good information. i wish Dr. Affolter had been a little clearer about what was vs what wasn't interface. There was a lot of this isn't it vs it is it that wasn't entirely clear. perhaps because I haven't been doing a lot of diagnostic domestic animal path for awhile, but it could have been clearer.

Q6

Do you have a suggestion for future topics?

neuropath, exotics

Dr. Affolter – Interface dermatitis alopecia	Excellent	Excellent	Excellent	Excellent

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

Really good speakers and a great topic, very important in diagnostic pathology and a very complicated field, especially for those people not specialised in vet dermatopathology.

Q6

Do you have a suggestion for future topics?

GI endoscopic biopsies (diagnosis of IBD, differentiation from lymphoma), hemolymphatic tumors (especilly diagnosis of lymphoma in dogs an cats and BM marrow evaluation), liver pathology in dogs and cats, endometrial biopsy evaluation in mares (is there an updated information?), ocular pathology in dogs and cats.

Q2

Please evaluate the following:

Seminar usefulness **Above average**Seminar delivery (do not rate your own IT issues/connection speed) **Above average****Q3**

Faculty evaluation

	Interest of subject to me	Organization of lecture	Presentation of lecture	Illustration of lecture
Dr. Bradley – Dermatitis in domestic animals – patterns, problems, pairing	Excellent	Excellent	Very good	Excellent
Dr. Linder – Skin pigmentation and comparative pathology	Excellent	Excellent	Excellent	Excellent
Dr. Mauldin – Expanding differential diagnoses for dermatopathologic lesions	Excellent	Excellent	Excellent	Excellent
Dr. Affolter – Interface dermatitis alopecia	Excellent	Excellent	Excellent	Excellent

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

It was helpful to see and hear all of this information in one day. The presenters must have coordinated well- they were aware of each others info. Great job.

Q6

Respondent skipped this question

Do you have a suggestion for future topics?

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

highly informative review, particularly the patterns associated with specific dermatologic processes. These lecture series provide an excellent overview of specialities for the diagnostic pathologist

Q6

Do you have a suggestion for future topics?

pig diseases, cattle diseases, although you may not attain the same level of audience as with the dermatopathology, these would be invaluable for diagnostic services.

Q1

What is your specialty?

Diagnostic veterinary pathology - agricultural

Q2

Please evaluate the following:

Seminar usefulness **Excellent**Seminar delivery (do not rate your own IT issues/connection speed) **Excellent****Q3**

Faculty evaluation

	Interest of subject to me	Organization of lecture	Presentation of lecture	Illustration of lecture
Dr. Bradley – Dermatitis in domestic animals – patterns, problems, pairing	Excellent	Very good	Very good	Very good
Dr. Linder – Skin pigmentation and comparative pathology	Excellent	Excellent	Excellent	Excellent
Dr. Mauldin – Expanding differential diagnoses for dermatopathologic lesions	Very good	Average	Average	Very good
Dr. Affolter – Interface dermatitis alopecia	Excellent	Excellent	Very good	Very good

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

Excellent seminar and Dr. Linder's presentation was absolutely outstanding! I thought that would be the lecture that would be somewhat bland but I was completely enthralled.

Q6

Do you have a suggestion for future topics?

Dermatopathology for non-typical species (more bovine, small ruminant, horse, zoo/wildlife)

An immunohistochemistry review - what are the latest/best markers to use for a variety of neoplasms and infectious agents. Including some atypical species (birds, etc)

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

There were a lot of tips and tricks and the presenters being open about their struggles with and how complicated dermpathology is in general, even for them, was helpful. The fact that some felt that it takes up to 4x longer to read a skin biopsy, made me feel less incompetent as I find these take me maybe 5-7x longer than other biopsies was reassuring that it isn't just me ;o) I really liked that Dr. Affolter did a 1+1 topic/time approach. Questions in the middle allowed for a stretch break and to re-focus for the next topic. Dr. Bradley's topic almost needed more time - there was so much information (all very valuable). I was very happy to see Drs. Mauldin and Affolter referring back to the patterns he initially discussed, it helped me solidify those a bit better. Overall it was a very cohesive group of lectures. I really appreciated Dr. Linder's "Road map" for his talk. Helped me remember where we were at and made a very gen. path heavy talk much easier to follow. I also liked that Dr. Mauldin used her cat as a visual cue that she was about to change to a different topic. Made it easy for my overwhelmed brain to keep topics in boxes and not have them run together. The comparative pathology approach was also very helpful for me. A lot of terms are derived from the human literature and having the speakers go through and discuss limitations of these and where some of the terms fall down and how we can make vet dermpath language less ambiguous was helpful for me too. It helped to clarify terms and definitions that I have occasionally struggled with. Their 'round table' discussion approach when answer questions was also very helpful :) Great Day! It definitely made getting up at 2am and then going to work for 5 hours after the lecture worth it!!!! Thank you Bruce & Paco (and assistants) for organizing these CE opportunities.

Q6

Do you have a suggestion for future topics?

I'm really looking forward to the additional Day Seminars that are planned. Neuropathology would be nice to see as a topic. Reproductive pathology too. I loved the 'round table' answering question approach. I attended the ACSVP rounds last week (they have opened them to non-members to help folks get CE credits). It had a similar approach to one person presented cases and then there were 3-4 other people who discussed their different approaches or differing ideologies on topics. Other attendees could type in their questions to be answered too. I would love if a similar Rounds style digital meeting could be facilitated for Anatomic Pathology (maybe monthly) even after SARS-CoV2 pandemic restrictions ease... presenting challenging cases or new areas of research or discussing areas where people differ in their diagnostic approaches...

Q1

What is your specialty?

ECVD resident

Q2

Please evaluate the following:

Seminar delivery (do not rate your own IT issues/connection speed) **Excellent**

Q3

Faculty evaluation

	Interest of subject to me	Organization of lecture	Presentation of lecture	Illustration of lecture
Dr. Bradley – Dermatitis in domestic animals – patterns, problems, pairing	Excellent	Excellent	Excellent	Excellent
Dr. Linder – Skin pigmentation and comparative pathology	Excellent	Excellent	Excellent	Excellent
Dr. Mauldin – Expanding differential diagnoses for dermatopathologic lesions	Excellent	Excellent	Excellent	Excellent
Dr. Affolter – Interface dermatitis alopecia	Excellent	Excellent	Excellent	Excellent

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

Really good

Q6

Do you have a suggestion for future topics?

Hope new derma topics coming soon

Q1

What is your specialty?

Diagnostic pathologist

Q2

Please evaluate the following:

Seminar delivery (do not rate your own IT issues/connection speed) **Excellent**

Q3

Faculty evaluation

	Interest of subject to me	Organization of lecture	Presentation of lecture	Illustration of lecture
Dr. Bradley – Dermatitis in domestic animals – patterns, problems, pairing	Excellent	Excellent	Excellent	
Dr. Linder – Skin pigmentation and comparative pathology	Below average	Very good	Very good	
Dr. Mauldin – Expanding differential diagnoses for dermatopathologic lesions				
Dr. Affolter – Interface dermatitis alopecia				

Q4**Respondent skipped this question**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

All but Dr. Linder's seminar were very useful in day-to-day diagnostic work. His seminar was far more academic. I found it conceptually interesting, but not applicable to the rest of the seminar.

Q6

Q1

What is your specialty?

Diagnostic pathology

Q2

Please evaluate the following:

Seminar usefulness	Above average
Seminar delivery (do not rate your own IT issues/connection speed)	Excellent

Q3

Faculty evaluation

	Interest of subject to me	Organization of lecture	Presentation of lecture	Illustration of lecture
Dr. Bradley – Dermatitis in domestic animals – patterns, problems, pairing	Excellent	Very good	Very good	Very good
Dr. Linder – Skin pigmentation and comparative pathology	Very good	Excellent	Excellent	Excellent
Dr. Mauldin – Expanding differential diagnoses for dermatopathologic lesions	Excellent	Very good	Very good	Excellent
Dr. Affolter – Interface dermatitis alopecia	Excellent	Very good	Excellent	Excellent

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

Excellent, well-organized and executed (and a bargain at \$50). I would have liked more case presentations to make sure I was grasping the concepts that were being presented.

Q6

Do you have a suggestion for future topics?

- Anything with emphasis on neoplasia in cats/dogs (proper diagnosis, prognosis, ancillary testing, clinical relevance for treatment) - melanocytic neoplasia, lymphoma, mammary neoplasia, oral neoplasia
 - Canine diagnostic liver pathology (help!)
-

Dr. Affolter – Interface dermatitis alopecia	Very good	Excellent	Excellent	Excellent

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

Really great. The science lecture on skin pigmentation was so interesting and gave me a whole new perspective on melanocytes. The clinical talks all have very useful information in them. I especially loved Dr Affolter's topic and pace of delivery. Dr Bradley's lecture was stuffed full of clinical detail and Dr Mauldin gave some really interesting perspectives on clinical reasoning in derm cases. The Set up via zoom works really well and even the minor technical bilps cause minimal issues (just a chance to make another cup of tea).

Q6

Do you have a suggestion for future topics?

I find bone pathology challenging so I'd like more CPD on that. Also I find endoscopic gut biopsies really frustrating as I never feel I am that clinically useful, so an update on what we are able to interpret from those types of samples would be great. Thank you for organising these.

Q4**Yes**

Did the Seminar meet your expectations?

Q5

What is your overall evaluation of the Seminar?

Probably the best, single day of intensive learning that I've ever attended - this was fantastic

Q6

Do you have a suggestion for future topics?

An overview of neuropathology (with focuses on demyelinating diseases, congenital disorders, subtle or early histo lesions, and the use of special stains in diagnostics). Also, if you can ask Dr. Cianciolo to do a session on glomerulosclerosis, feline CKD, etc... we'd all learn a lot!
