

Dear 2021 Gross Pathology Review Course Participants:

The start of May means that the **Gross Pathology Review Course** starts in just under 2 weeks, from **May 17th - 21st**! The pathology faculty at **The Ohio State University** and our colleagues from other veterinary colleges and industry are excited to meet you, albeit virtually.

We have assembled an impressive slate of speakers to provide a comprehensive review of gross pathology in special species and various organ systems of domestic animals. Supplemental information will be presented to facilitate preparation for the ACVP Phase II Certifying Examination.

Materials for all lectures and both mock exams will be available through the Davis-Thompson Foundation's Canvas online course management system. You will receive an email notification from Canvas to register your account. Modules have been set up for each day of the week and are organized by faculty. CVs for faculty have been provided for you to review so as not to take up valuable time with extensive speaker introductions. As the course nears, faculty will be uploading their lecture materials, and I will alert you of any updates uploaded after the course has begun. A course calendar in Canvas is available to supplement the lecture schedule (attached). Don't forget that all times listed are in the Eastern Daylight Time (EDT) zone. Additionally, announcements will be posted through Canvas. So be sure to set up your account and start accessing! You will be able to access this material from Canvas until Thursday August 19th, 2021 (the day after Phase II). Lecture recordings will also be accessible to registrants from June 1st – 21st, 2021 via a link you will be emailed when available.

A single Zoom link (<https://us02web.zoom.us/j/84458717281>) will be used for all sessions during the entire week. For your convenience, this link is also posted as an announcement and at the top of each day's module on Canvas. A course faculty member other than the presenter (usually me) will be moderating the chat and Q&A for each lecture. The moderator will address easy questions/clarifications in real time through the chat as they arise. However, due to time limitations and the number of sessions, content-specific questions will be addressed by the speaker in a written document that will be uploaded to Canvas after the conclusion of their lecture(s).

Registrants will be emailed a course evaluation towards the end of each day, which encompasses the presenters for that particular day. Friday's course evaluation will also include an opportunity for registrants to provide feedback on the overall course format and cast their vote for the 2021 Samuel W. Thompson Lectureship Award. The links for these evaluations will also be included in the respective day's module on Canvas. Please be sure to share your feedback, which is instrumental in planning future courses.

Important reminders:

- Please be sure to check your “Unimportant” / “Junk” / “Spam” email folders so you don’t miss any important notifications from Canvas or the Foundation’s listserv.
- If you encounter technical issues with Zoom, Canvas or rebroadcast lectures, or have questions regarding your registration or certificate of attendance, please contact host.2@davisthompsonfoundation.org.
- A course faculty email distribution list has been established, grosscourse_instructors@list.cldavis.org, for questions regarding course material.

“See” you soon!

Sincerely,

Krista La Perle, DVM, PhD, Dipl. ACVP

Gross Course Director
